New York, NY 10021

December 10, 1996

Dear Dr. Choy,

I felt compelled to write this letter to express to you my gratitude for everything you have done for me.

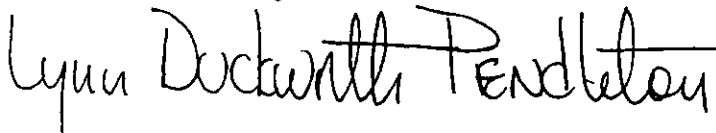

I am a very busy business woman, mother and wife. I was suffering terribly with the pain from a herniated lumbar disc. While traveling for one month in the orient this past September, the pain was so severe that I found it impossible to sit, to concentrate on work or manage a daily routine.

Fourteen years ago, I also suffered with another herniated disc and was treated with the 'passive approach' of four weeks of bed rest, traction and physical therapy. While that treatment was successful, I did not feel that it was the best approach for me today.

Upon learning of your technique, 'percutaneous laser disc decompression' (PLDC), I knew immediately that this was what I wanted to pursue. Your procedure has allowed me to resume a normal pain free life with such ease. One week after the procedure I was back at work and three weeks after I was completely pain free.

Thank you so much Dr. Choy for developing 'PLDC', you have given chronic back pain sufferers like myself new hope without having to face a surgeons knife or weeks and weeks of bed rest!

Best Personal Regards,

Lynn Duckworth
